## How do background checks work?

Customer Support - 2020-04-22 - in SeekingArrangement

We understand that safety is a **top** priority for our members, and sporting our "Background Verified" badge is a great way to show it!

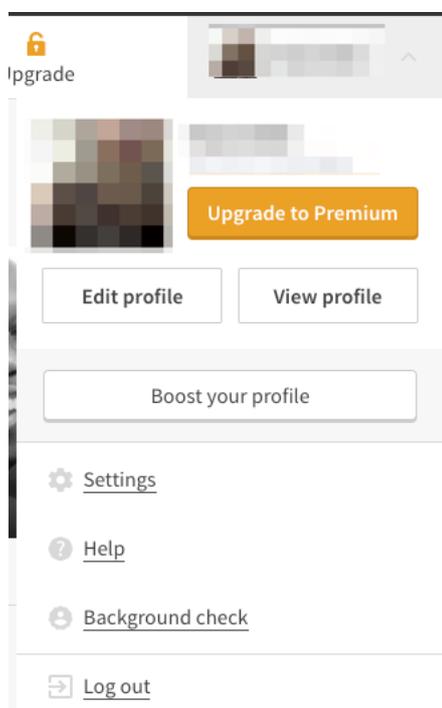

The "Background Verified" badge is only placed on a member's profile after they have purchased **and** passed a background check through our website. This helps to boost the profile's legitimacy to interested users; however, it does not verify wealth or income.

Our background verification is completed by a 3rd party processing service called *Optimum Screening* -- more information [here](#) -- any questions or concerns regarding the process itself can be best addressed by their Customer Service team [online](#) or at: **1-800-391-8013**.

<https://www.seeking.com/background-check/>

To purchase a background check, you can either click on the link above or access it through your profile by following the steps below.

- 1.** Locate your profile photo thumbnail at the top right-hand corner of your browser and click on "Background Check." You'll be redirected to the correlating Optimum Screening webpage.

- 2.** Once redirected, simply follow the on-screen prompts to continue the process!

### **:: PLEASE NOTE ::**

- **If your profile is incomplete, the option to initiate a background check will not be available. Please be sure that all required fields are filled out and approved before attempting to begin the background screening process.**
- **This option is only available to members living in the United States at this time, due to the screening service's current zone limitations.**
- **The "*Background Verified*" badge will be displayed on your profile for 180**

**days (this is confirmed during checkout, as well)**
